

## New From ZEKs!

### NCE Series

#### Non-Cycling Refrigerated Dryers

NCE Series represents an entirely new non-cycling dryer offering from ZEKs. These dryers incorporate, as standard, features that deliver the highest level of operating efficiency, including:

- **Microprocessor Control**
- **VSD Condenser Fan Control**
- **Precooler/Reheater**
- **Fully Hermetic Refrigeration System**
- **Electric Solenoid Drain**

The five new models, in a flow range from 11-64 SCFM, are compact in size and quiet in operation. Connection within the compressed air system and utility hookup are all that's required to have clean dry air with NCE Series.

**ALL  
NEW!**

Non-Cycling  
Refrigerated Dryers

#### And For High Temperature Applications...

### HTB Hi-Temp

HTB Hi-Temp dryers have the same features as NCE models and are specially engineered to address the unique requirements of high temperature applications:

- **Integrated Air-Cooled Aftercooler**
- **Air to Air Exchanger**
- **Internal Coalescing Filter**

HTB Hi-Temp dryers eliminate the need for separate aftercooler, separator and drain – **Only one piece of air treatment equipment to purchase and maintain!**

Six HTB models from 15-100 SCFM make selection of the right model easy.

**With an impressive list of standard features, UL Listing and proven reliability, NCE and HTB dryers deliver tremendous value for small compressed air applications.**

**Authorized ZEKs Distributors are able to provide detailed information about NEW NCE Series and HTB Hi-Temp dryers from ZEKs.**

**ZEKS Uses Only  
Environmentally Friendly Refrigerants.**
