

Energy Savings and Process Protection

The Complete Pressure Control Solution

The new XPE Series XpandAir™ from ZEKS is a complete air system pressure control solution that not only saves energy, but protects critical applications against unacceptable pressure decay. It's unique design provides air users with the benefits of three modes of dynamic pressure control:

XPANDAIR™
Precision Pressure & Flow Controller

Features:

- Three Operating Modes
- Modbus Communication-Ready
- 3-Valve Bypass
- 2"-8" Sizes Available

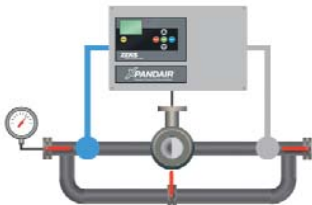

Benefits:

- Lower Overall System Pressure
- Optimum Air Compressor Operation
- Constant, Precise System Air Pressure
- Minimum Waste Through Air Leaks
- Reduce Air System Operating Cost

Forward Control

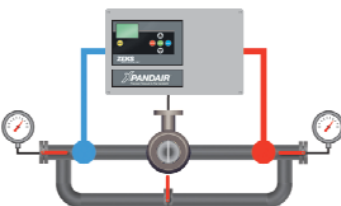

Precision demand control to optimize compressed air utilization

Backward Control

Backpressure regulation to protect supply-side pressure

New!

Combination Control

Demand-side control with supply-side protection

New!
