

Performance. Reliability. Serviceability. Eclipse™ Delivers!

ZEKS engineered Eclipse™ Desiccant Dryers to include attributes that matter where it counts most - in the field. Because scheduled maintenance ensures continuous optimum performance of desiccant dryers, Eclipse™ dryers are configured for convenient troubleshooting and maintenance.

With several thousand units installed, Eclipse™ performance, reliability and serviceability have been proven in a wide range of applications.

Eclipse™ is available in three models for Heatless, Heated or Heated Blower Regeneration, in capacities from 90-8,000 SCFM.

Look to ZEKS Hydronix™ for performance, reliability and serviceability in 20-60 SCFM applications.

Eclipse™ delivers with Best-In-Class features:

- **High Performance Valves** - *Reliable operation plus reduced maintenance*
- **Convenient Service Access** - *Minimizes maintenance time requirement*
- **Advanced Controls Group** - *Digital performance control; Solid state heater control*
- **Options For Energy Savings** - *Minimize operating cost and optimize air system operation*
- **Remote Communication-Ready** - *Multiple communication options*
- **Low Profile Design** - *Enhances installability; Minimizes shipping cost*
